Overview:

G3 developed an optimized user interface for the Electronic Health Record (EHR) for the US Army Medical Department (AMEDD) based out of Ft. Detrick, MD. The Army Health Care Team is one of the largest comprehensive systems of health care in the country. The Soldier Medical Health Portal was designed to provide a comprehensive on-line capability across a broad spectrum of medical services.

Features:

- Provides optimized workflow for clinical and hospital workflow.
- Runs on top of industry-standard systems to improve workflow.
- Integrates with Epic, Cerner, Allscripts, McKesson and others.
- Integrates data exchange between systems using G3 MDAA.

Benefits:

- Dynamic workflow engine adapts to specific user patterns based on task.
- Streamlines the process of patient diagnosis and treatment.
- Integrates with G3 platforms such as MDAA, SNS, MEQA and TACF.
- Integrates with G3 mobile healthcare data collection (MHDC) platforms.
